PROFESSIONAL SUMMARY

Full Stack Developer and IT student at Walchand College of Engineering with solid foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and software development. Experienced in building scalable web and mobile applications using MERN stack, Java, Android, and Django. Skilled in real-time systems, AI-powered solutions, RESTful APIs, AR technology, and Firebase, with proven ability to deliver high-quality projects from concept to deployment.

EDUCATION

Program	Institution	%/CGPA	Year
B.Tech in Information Technology	Walchand College of Engineering, Sangli	9.16 CGPA	2025-2028
Diploma in Computer Engineering	Government Polytechnic, Miraj	95.26%	2022-2025
Class X (SSC)	City Highschool, Sangli	95.00%	2021-2022

EXPERIENCE

Python Development Intern | Orbit Solutions

Jun 2024 - Jul 2024

- Developed a Face Emotion Detection System using Keras, TensorFlow, and OpenCV, achieving 70% accuracy across 7 emotions.
- Trained the CNN model on a Kaggle dataset of 5000+ images (700+ images per emotion) with effective data augmentation.
- Implemented key libraries including NumPy, Pandas, Matplotlib, and Keras for data preprocessing, model training, and visualization.
- Built an end-to-end pipeline from data loading to real-time emotion prediction, demonstrating strong deep learning and problem-solving skills.
- Collaborated in a team environment following software development best practices and version control.

PROJECTS

TeachConnect – Smart Classroom Management & Interactive Learning Platform

Tech Stack: Java, XML, Firebase Firestore, Google Maps API, Media3 ExoPlayer, Jitsi SDK

- Developed a full-featured Android classroom management platform with role-based access, tested with 100+ students.
- Implemented GPS-based attendance validation to prevent proxy attendance, achieving 80% location accuracy.
- Built 6+ core modules including assignments, quizzes, polls, real-time chat, and live meetings, reducing manual workload by 60%.
- Enhanced student engagement using Media3 ExoPlayer with MCQ checkpoints, improving average session time by 40%.
- Integrated Firebase for secure authentication and real-time synchronization, successfully tested with up to 5GB of educational content.

MeetIQ - AI Powered Live Meeting Intelligence System

Tech Stack: Electron, React.js, Node.js, Express.js, MongoDB, OpenAI Whisper, Groq AI

- Architected a full-stack AI platform that converts live meetings into searchable transcripts, summaries, and action items using speech recognition and large language models.
- Processed real-time audio streams and multimodal meeting data to automate documentation workflows, reducing manual note-taking effort by 70%.
- Built scalable backend services using Node.js, Express.js, and MongoDB to manage meeting insights and support concurrent users.
- Designed end-to-end system architecture integrating Whisper, Groq AI, React, and Electron for low-latency desktop deployment.

AR-Based Furniture Shop Management System

Tech Stack: React.js, Django, MongoDB, Android Studio

- Developed an AR application enabling users to visualize 100+ furniture items in real-world environments using marker-based AR rendering.
- Designed 10+ RESTful APIs using Django, supporting CRUD operations and real-time inventory synchronization.
- Created responsive user interfaces in React.js, cutting page load time by 25% through streamlined component rendering.
- Refined MongoDB storage and retrieval for 500+ product records, reducing average query time by 40%.

TECHNICAL SKILLS

Languages: C | C++ | Java | Python | JavaScript

Databases: MySQL | MongoDB | Firebase

Tools: Git | GitHub | Android Studio | VS Code | Postman

Web Technologies: HTML | CSS | React.js | JavaScript

Backend: Node.js | Express.js

Core CS: DSA | OOP | DBMS | OS | Computer Networks

SOFT SKILLS

Problem-Solving | Leadership | Event Management | Communication | Presentation | Teamwork

POSITION OF RESPONSIBILITY

Project Leader - Diploma Final Year Project

- Led a team of 5 members throughout project planning, development, testing, and deployment.
- Coordinated task allocation and project milestones to ensure timely completion.
- Defined system architecture and supervised implementation of core modules.
- Resolved technical challenges and improved overall team productivity.
